Phalerae of the goddess Diana

A phalerae on the theme of the ancient goddess Diana. Diana on the left with a quiver of arrows on her right shoulder, a crescent moon on her head as depicted on ancient statues. This is a boutique project that I think I did well with!

Diameter about 80 mm.

Silver plated model.

Partially gilded version! From the collage it can be seen that the phalerae has high relief!

My creative wax work!
