Phalerae of Tiberius

70 mm.

This is a model inspired by other similar phalerae images. We created this phalerae to honor this great Roman emperor Tiberius.

Because of his military merits on the borders of the Rhine and the Danube we have depicted his image in an oak wreath! We have it in brass and in silver-plated version.

Our wax model:

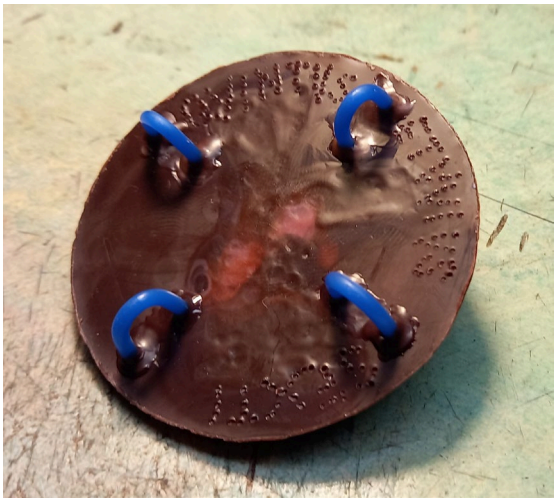
……

Tiberius' phalerae is with a bust of imp.Tiberius with a kerassa, armor, and a laurel wreath. All this in a wreath frame! My waxwork are based on Naples, Archaeological Museum. Diameter of phalerae about 70 mm.

EmperorTiberius, bust in cuirass armor ,hangers with image of god Pan, is based on a statue of Tiberius. Busto di Tiberius (Naples, Archaeological Museum).

Silver plated version.

Partially gilded version! From the collage it can be seen that the phalerae has high relief!

Ready cast from brass! Tiberius' phalerae!Based on one of the most successful images conveyed by an ancient master in a small bust ,golden pendant of Tiberius - wearing a laurel wreath from Alton – Hampshire! Size of the phalerae 70 mm.


My new wax creative solution of imp.Tiberius' phalerae!
