Roman replica rings

Gem legionary rings.

The Gem is classic for the model- Legionnaire eagle between two signum. The place below is very limited and should cuts must be made when the letters are cut. One letter is 1 mm. long

The original (on the right) is with legion XI Clavdia PF.

But my legion is IIII SCYTHICA.

Gem rings dedicated to the legion GEMINA XIII.

Cut and ready-to-install gems for some of the popular legions in roman reenactment society. Along with various popular for legionnaires images which are well known from archeology

Ring with gem, with inscription L XX VV

Tiberius ring with carnelian intaglio (gem).

My modest replica of Gold ring with carnelian intaglio portrait of Tiberius. Of course my product is a modest brass replica. Publication - The Metropolitan Museum of Art.

Roman rings with different imperial profiles

Rings with different imperial profile as well as with the Roman denarius.

On the side of the ring there is inscription GLORIA EXERCITVS, about 17-20 gr.

Several wax models:
