Griffin oil lamp

The oil lamp bears the image of the Griffin.

Both models are differences in size and details. 1st model 14,6 cm./5cm. weight 365 gr. The 2nd model 14,4 cm./4,7cm. weight 385 gr. The replicas are fully functional for reenactment purposes.

The wax models are hollow as it should be by technology.

Low stands for oil lamps. Many similar low pedestals are found mainly in Pompeii and Herculaneum. Of course, they are also found in other finds, such as burials at the borders of the entire Roman Empire. This is our replica in which the function has proven to be very successful.
