

Legionary ring

For a long time I was looking for a model of legionary ring to inspire me. This is a photo of original, of a legion silver ring of LEG I ADIVTRIX published a few years ago on the internet. The rings bearing signs of the legion in which its owner served.

These are finished and engraved rings in 2 sizes. The message of them, of course, refers to the legion we recreate in our club LEG IV SCYTICAE. It is written with an abbreviation similar to the original.

These are wax models which after being cast in metal will be engraved.
