

**Coolus from Museum in Zagreb and from private collection published in FB.
Together with our replica.**

<http://www.facebook.com/photo.php?fbid=320063141412410&set=a.299127053506019.73445.100002261792196&type=3&theater>

For me this is a typical classic-shape of Coolus with so rounded cupolas .
More like(for me) this is the Coolus C helmets..an earlier version from 30 B.C. to 40 A.D.
This functional helmet may be used by auxiliaries soldiers to the end of a 1 -st century
A.D.

Fig. 3: Helmet, Rugvica.

Thanks to the pictures provided by Ivan Radma- and "Cohors Praetoria" we received a good idea of the shape. This is our attempt to make replica in our club. This is just a prototype. Material tinned brass. Hammered by hand without mold use .
