

## Ritual objects, rings and buckles

Our ritual objects.

Together with the rod depicts the head of a griffin.

This new divine silvered Kylix will bring us closer to gods of ancient Olympus.

After I being inspired by exhibits Scythian rod from Historical Museum of Dobrich, I decided to recreate this rod for our club ritual needs!

Our ritual tools in collage with our early antique rings.

Gem engraving (ring seal)

It is just a reenacting ring not exactly the same copy of the original ring and it is better not to be!

Two rings with gorgeous image which depicts mythological story of Leda and the Swan!

One of them presents Cameo standing out image

Second one Gem engraving (ring seal)

Leon-head Buttons and "Bow shape" buckles

Our new ritual greek silver plated Phiale. Together with the rod depicts the head of a griffin. With little wine diluted with water.

The bottom of the Phiale depicting mythological scenes with Tegey Princess Auge- Athene's priestess, and Heracle.
